Built specifically for orthopedics!

Lifestyle Health & RPM, inside the Phoenix Go cloud-based EHR

Phoenix Ortho has partnered with Prescribe FIT, a virtual lifestyle health and remote patient monitoring (RPM) program built specifically for orthopedic practices.

Together, Phoenix Go + Prescribe FIT make it easy for practices to:

- ✓ Extend care beyond the office
- ✓ Support better outcomes and patient experience
- ✓ Create new recurring ancillary revenue

"We have found a significant difficulty with declining reimbursements and the ability to run a patient-centered orthopedic practice. Prescribe FIT has provided us an ancillary service that allows us to generate income and continue to provide a patient-centered approach to wellness and joint health."

- Dr. David Dickerson
Orthopedic Surgeon & Owner
Performance Orthopaedics & Sports Medicine

A POWERFUL NEW TOOL, AT YOUR FINGERTIPS

With Phoenix Go + Prescribe FIT, orthopedic practices can bring lifestyle health and RPM into everyday workflow with minimal disruption.

How it Works

Simple patient identification built into Phoenix Go

Lifestyle health and RPM are available right inside the orthopedic workflow your team already uses.

Optimize patients for surgery — and beyond

Help patients prepare for surgical or non-surgical treatment, recover more effectively, and reduce the risk of future issues.

Virtual root-cause & preventative treatment

Address weight, mobility, nutrition, sleep, and daily habits that drive pain, recovery, and long-term musculoskeletal health.

Make it easier on your team

Prescribe FIT handles patient outreach, coaching, and engagement, while your practice receives support for monthly RPM billing.

Why “One Tap” to Prescribe FIT in Phoenix Go

For Providers

A simple way to extend orthopedic care beyond the visit

For Patients

More support, better experience, and a clearer path forward

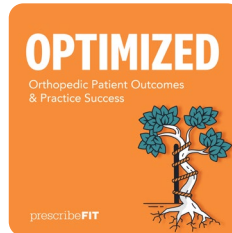

For Practices

A differentiated ancillary service and new monthly revenue stream

“The one-on-one interaction with my patient makes it seem like it’s an extension of me and my practice.”

— **Dr. Keith Berend**
Orthopedic Surgeon
JIS Orthopedics
